

# Fire Learning Network Notes from the Field

## Skull Knob Controlled Burn South Mountains Landscape

April 2014

**Fire Learning Network partners** in the South Mountains landscape recently conducted a 1,200-acre prescribed burn at Skull Knob on part of the state-owned area split between South Mountains Game Land and South Mountains State Park. The objectives of the burning included wildlife habitat improvement for early successional species, forest restoration in fire-adapted and fire-dependent oak and pine communities, and fuels reduction on the landscape. This was the second burn for most

of the unit, which is important because the unit scored high in the burn prioritization modeling done for the landscape (see map). It is also clear evidence that the partnership is starting to make large collaborative and multi-ownership burns more routine, helping to restore fire-adapted systems on a larger scale: All but one of the established burn units in this landscape has been burned at least once and several have received multiple burn rotations.

### Participating Agencies

- North Carolina Division of Parks and Recreation
- North Carolina Forest Service
- North Carolina Wildlife Resources Commission

**The partnership in this landscape has allowed for larger, more efficient and effective landscape-level burning projects by removing the barrier of property boundary restrictions, increasing the resources available, and finding common ground for expanding prescribed burning programs to meet common goals and objectives in the South Mountains Landscape.**

#### South Mountains Landscape - Focal Areas State-Owned Lands - NCWRC and NCDPR

South Mountains Game Land = 21,647 acres  
South Mountains State Park = 18,504 acres  
Total State-Owned Lands = 40,151 acres
