

FIRE EFFECTS MONITORING & TECHNOLOGY WORKSHOP

October 15 - 22, 2018

Stoney Camp, Santa Fe, NM
& Southern Rockies TRES

REGISTER AT:
goo.gl/BWcztV

This workshop is for trainee and qualified Fire Effects Monitors, fire ecologists, and specialists who are using new technologies for fireline operations.

The workshop will provide learning and training opportunities to improve safety and monitoring, and prescribed fire and suppression skills. Cadre will include teams who are developing and using UAVs to support wildland fire operations, experts in fire and smoke modeling and fire effects monitoring, and experienced FEMOs and fire ecologists.

The workshop will include 5 days of classroom and hands-on learning, and 3 days of FEMO trainee assignments on the Southern Rockies TRES prescribed fire where participants will be able to receive evaluations from qualified cadre.

Food and lodging will be provided. There is no cost to participate. Travel is on your own. Register by 8/29.
