## Data Call: (We need your help)

To stay current, we need the most up-to-date disturbance information from federal, state, local, private, and non-profit land managers (that's you!). This treatment information is used to update future vegetation and fuels layers.

Help LANDFIRE produce the most accurate products by uploading your disturbance events asap!

**Data Submission Deadline:** October 31. (For all disturbance / treatment activities occurring 10/1/23 - 9/30/24).

[\*\*Read the Data Call Letter\*\*](#)

## ***Available NOW:***

All Extents - Public Events Geodatabase

The LF Public Events Geodatabase is used to

determine disturbance causality in LF products and can be used in change detection analysis. The Public Events Geodatabase includes contributions from federal, state, local & private organizations.

**Public Events  
Geodatabase**

## PDist - CONUS

**Preliminary Annual Disturbance (PDist)** is another new product making its debut with the LF 2023 Update. PDist is designed to provide a second "draft" of landscape change information and will have multiple extent releases throughout 2024.

**PDist**

## LF 2023 Final Annual Disturbance - CONUS, Alaska

The **Final Annual Disturbance (Dist)** product is the "final" draft of Annual Disturbance data for a given version. Compared to PDist, Dist includes additional fires and disturbance events for FY2023, these events were harvested from a second "pull" of the national online sources in June 2024.

**Final Annual  
Disturbance**
